DETAILED ACTION

Response to Arguments

1. Applicant's arguments, (see pgs 5-15, filed 09/28/2006), with respect to claims 47-60 have been fully considered and are persuasive. The rejection of claims 47-60 has been withdrawn.

Allowable Subject Matter

2. Claims 47-60 are allowed.

Examiner's Statement of Reason for Allowance

3. The following is an examiner's statement of reasons for allowance for all claims:

Re claims 47, 52, and 54. The prior art fails to teach, or suggest, the limitations of: determining that the financial transaction participant is a politically identified person ("PIP") by referencing digital data in a memory of a computer system indicating that the participant has a status of at least one of: an elected official, a bureaucrat, a political appointee, a World Bank Official and a military personnel; calculating a first category political risk score based on the financial transaction data; calculating a second category political risk score based on the financial transaction data; and calculating, based on the first and second category political risk scores, an overall transaction political risk quotient associated with the financial transaction; and comparing the overall transaction political risk quotient with a risk quotient threshold to determine a suggested action associated with the financial transaction. The closest prior art is also **the best U.S art:** Basch et al (US PAT: 6,119,103), a method for predicting financial

Art Unit: 3692

risk, which includes receiving first transaction data pertaining to transactions performed on a first financial account. The first financial account represents a financial account issued to a given account holder by a first account issuer. The method further includes receiving second transaction data pertaining to transaction performed on a second financial account different from the first financial account. The second financial account represents a financial account issued to the given account holder by a second account issuer different from the first account issuer. There is further included scoring the first transaction data and the second transaction data based on a preexisting model to form a score for the account holder. Additionally, there is included transmitting, if the score is below a predefined financial risk threshold, the score to one of the first account issuer and the second account issuer. Although, Basch mentions predicting a particular type of risk i.e., financial risk, that is not the same as or suggestive of Appellant's claimed political risk. Thus Basch exclusively discloses financial risks, not political risks as disclosed by the applicant. Further, **while the political risk scores and political risk quotient claimed by the applicant are associated with a PIP (politically identified person), Basch's multiple financial risk scores and financial risk threshold are associated with the financial account holder, not taught to be a political identified person. Lastly, Basch discloses the generation of multiple financial risk scores, but silent on the generation of political risk scores as disclosed by the applicant.**

Furthermore, Lewin, Rebecca (Banks Use AI to Battle Fraud, Bank Systems and Technology, v32 n11 p22(1) Nov 1995), cited prior art, discloses the detection of money

Art Unit: 3692

laundering and other banking fraud using artificial intelligence systems. However, there is no mention of how this detection is carried out.

Lastly, Coppola, James (WO00/75836 A2), cited prior art, discloses a method and system for managing investment portfolio risk. James risk is associated with an investment account i.e., investment portfolio. However, the applicant's disclosed risk is associated with a politically identified person. Further, while the applicant discloses political risk and political risk scores, James discloses financial risk and point risk value.

Updated searches revealed no references that disclosed the claimed inventions, nor were any secondary references identified which could be reasonably combined with Basch.

The drawings submitted on 01/30/2001 are acceptable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
